

To Whom It May Concern:.

I am a licensed Technician (KD5ZGU/FRN 0009702879) and I encourage the FCC to adopt the ARRL's RM-10867 and the National Association for Amateur Radio's RM-10870 immediately. These proposals will be good for the future of amateur radio. They will also be good for the manufactures and re-sellers since tens of thousands will be seeking HF radios stations. More importantly, it will be good for the Nation since thousands more will be available for emergency communications.

Since even the FCC has stated that code testing is no longer a necessity, these rule changes should be made as soon as possible.

Sincerely,

Grady E. McCright KD5ZGU
